

AQUALIFE

PROJECTS 2025

OVERVIEW

AQUALIFE was established on 2006 in Athens, with the sole aim to provide exquisite solutions through punctuality and the highest levels of professionalism.

Focusing on its vision and building up on the company's solid history and references, **AQUALIFE** became one of the leading companies in the section of waterproofing services, acrylic panel installations for aquariums and swimming pools and in the design of unique animated fountains.

OUR
VISION

“To become the most preferred choice of our clients by achieving excellence in quality and timely executed projects.”

AQUALIFE is a Greek based company with branch offices in Cyprus and Dubai, that brings together the most updated design and construction technologies, this industry has to offer.

ABOUT

Since its initial establishment, **AQUALIFE** had the vision and drive to build a strong network of clients and suppliers based on the high quality of our services and strong commitments. We have the capability and business structure to meet the needs of all our customers in the areas of Specialty Coatings, Mechanical, Electrical and Plumbing (MEP) contracting services.

A photograph of two construction workers in a trench. The worker on the left is wearing a white hard hat, a blue shirt, and a bright yellow safety vest. The worker on the right is wearing a yellow hard hat, a grey shirt, and an orange safety vest. They are both leaning over the edge of the trench, which has a corrugated metal edge. The background is a concrete wall with some rebar visible at the top. The overall scene is brightly lit, possibly by sunlight, creating a hazy atmosphere.

03

KNOW HOW

We at **AQUALIFE**, are equipped with the technical and organizational efficiency needed to assist the construction firms in meeting the highest quality standards of most of the specialty subcontractor requirements.

04

Over the years, **AQUALIFE** has been providing unique and exceptional services in the Specialty Coatings Section in Europe, Middle East, North and South Africa.

PROJECT STAGES

AQUALIFE has the technical expertise and in house engineers to provide aquarium window installation with glass or acrylic panels. Our team is perfectly capable of designing and submitting to the General Contractor the shop drawings of the rebates.

Once **AQUALIFE** is contracted, we confirm the design of the rebates and we submit the approved plans for manufacturing the acrylic panels. Our company works closely with the most premium acrylic manufacturers to secure on-time delivery and the best cost for our clients.

Our team will make sure that each stripe is calculated to lift the load of each acrylic panel, without stressing the stripes or the panels. Our specialized staff will guide the crane operator to place the acrylic panels safely into position.

- ~ Professional Equipment
- ~ Rebate Casting Inspection

- ~ Aquarium Waterproofing
- ~ Installation Hydrotest
- ~ Waterproofing Certificate

SERVICES
INCLUDE

SAFETY

AQUALIFE experts carry a medical and life insurance coverage. Consequently our staff will work only under the strictest safety procedures. So, once the acrylic panels are aligned and they are in position, we secure them and proceed to the aquarium waterproofing. Once the installation is over, we secure the acrylic panels by applying a thick plastic protective film. There are different methods of installation for each aquarium project. Please contact Aqualife to get a detailed method statement related to aquarium window installation.

RELIABLE

AQUALIFE is the only professional aquarium window installer in the market that takes under its contractual liability the repairs and the preparation of the concrete or steel rebates. Although our competition will try to avoid this liability, at Aqualife we have the confidence and experience to handle this task so that the general contractor or the client will not have to deal with liability disputes and project delays.
